

Rolled Products

Our Passion. Innovation.

The processing of aluminium into advanced semi-finished products is both our business and our passion. For two centuries, we have been driven by innovation, development-oriented thinking, flexibility and versatility.

We work closely with and for our customers. Together, we develop new alloys, provide expert guidance and continuously seek innovative solutions to optimise our processes and products. Our sustainable business growth, ongoing modernisation, expansion of production capacities, and broad portfolio of products and alloys are a strong assurance that, with us, you gain a reliable and long-term business partner.

Rolling represents one of our core production segments. Our technologically advanced rolled semi-finished products are manufactured at three production sites in three different countries. Over the past few years, our production volumes have increased significantly and continue to grow. This growth strengthens our reliability, flexibility and distribution capabilities.

By combining the advanced expertise of our development specialists with state-of-the-art equipment, we produce premium-quality cold-rolled strips, tread plates, circles and shapes, as well as hot- and cold-rolled sheets.

The largest segment of aluminium product

The basic manufacturing procedures are hot and cold rolling of aluminium and its alloys, where hot rolled strips serve as the source material for cold rolling. In addition to standard tempers and mechanical properties, entirely specific tempers, properties and quality of rolled products can be achieved through controlled cold working and heat treatments. The finally rolled coils are split into various widths with modern slitting lines. Sheet is obtained by cutting strips to lengths on cutting lines with a built-in roller straightener.

Process

Rolled Aluminium by Main Groups

- **Aluminium sheets**
- **Aluminium coils**
 - *plain*
 - *embossed*
 - *prepainted*
- **Aluminium tread plates**
- **Aluminium circles and shapes**
- **Aluminium plates**

SHEETS

EN AW-xxxx	temper	surface finish	thickness**[mm]	width**[mm]	length**[mm]
selected alloys in series 1000	O <i>soft</i>	mill finish	0.4 - 5.0	600 - 1525	600 - 6000
	H1x <i>strain hardened</i>	prepainted			
selected alloys in series 3000	H2x <i>strain hardened and partially annealed</i>	embossed			
	H3x <i>strain hardened and stabilised</i>	stucco D2010			
selected alloys in series 5000	H4x <i>strain hardened and laquered or painted</i>				
	DDQ* <i>available for selected alloys and tempers</i>

Packaging

Our products are packed according to the customer's wishes and our capabilities. Impol's standard packing methods include packing onto pallets, into crates or into boxes. Special packaging is also available on agreement. All packaging is returnable.

Each shipment is accompanied with a certificate of quality, which also proves the suitability of the materials.

**ONE COIL ON A PALLET
AXIS HORIZONTAL**

**TWO OR MORE

Standards and Chemical Composition

Our aluminium products are produced in different alloys according to European and international standards. Chemical composition, mechanical properties and tolerances of our products follow corresponding family of standards:

EN 515	Wrought products – Temper designations
EN 573-1,2,3,5	Chemical composition and form of wrought
EN 541	Rolled products for cans, closures and lids
EN 546-1,2,3,4	Foils
EN 602	Wrought products – Chemical composition of semi finished products used for the fabrication of articles for use in contact with foodstuff
EN 683-1,2,3	Finstock
AA	Aluminium Standards and Data

Our products comply with applicable European Union and other international legislation, directives, and other relevant regulatory requirements. We systematically monitor regulatory developments and updates to ensure that our products remain compliant with current legal and regulatory obligations. Where necessary, compliance is verified through testing conducted by accredited external laboratories. Compliance declarations and statements are available on request for our customers.

Ordering

For the quick processing of your inquiry we kindly ask you to provide us with the following data:

- Product type
- Alloy and temper or desired mechanical properties
- Dimensions and desired tolerances
- For coils, coil size (desired weight) and/or inside and outside diameter
- Purpose of use or desired mechanical properties
- Quantity

Aluminium is a reason to believe in a zero waste future. About 75% of the aluminum produced at any time is still in use.
